Fermentation-derived protein

Precision-fermented, cultured and yeast-biomass ingredients for pet food

SOURCE VERSION	PRODUCT BASIS
1.0 (2026-08-31)	Dry powder, as sold

01 Recorded limits

Ceilings in µg/kg (ppb). Provenance labels describe the supplied record; instrument verification remains a separate gate.

ANALYTE	CEILING	PROVENANCE / SOURCE
Lead Pb	20	Read-across [1]
Cadmium Cd	40	Read-across [2]
Total arsenic tAs	100	Read-across [3]
Inorganic arsenic iAs	100	Precautionary [4] Source floor: 150 µg/kg
Total mercury tHg	20	Read-across [5]
Nickel Ni	800	Read-across [6]
Aluminium Al	100,000	Read-across [7]
Total chromium Cr	500	Read-across [8]
Tin Sn	250,000	Read-across [9]

02 Additional species

SPECIES	CEILING	RECORD DISPOSITION
Methylmercury (MeHg)	20	Bounded by tHg [5]
Hexavalent chromium (Cr-VI)	500	Bounded by Cr [8]

All eleven recorded analytes remain visible. A parent-bound ceiling is shown numerically. Assay timing and speciation triggers require the approved testing schedule.

> **REVIEW COPY**
>
> Layout proof only. Values are transcribed from the local compiled record; this copy does not approve their legal basis or issue a certification standard.

Sources behind the schedule

Reference numbers connect every ceiling to its recorded instrument. Scope is reproduced from source metadata, including read-across analogs. These are source pointers, not a fresh primary-text verification.

REF / USED FOR	RECORDED INSTRUMENT AND SCOPE
[01] Pb	Hong Kong Cap. 132V Cereal-based food intended to be consumed principally by persons under the age of 36 months
[02] Cd	Commission Regulation (EU) 2023/915 pulses, general
[03] tAs	Paraguay Decree 1335/2019 pulses, dried legume seeds, except soybean
[04] iAs	Commission Regulation (EU) 2023/915 non-parboiled milled rice
[05] tHg, MeHg	China GB 2762-2025 Paddy rice (as brown rice, footnote b), brown rice, rice and rice flour, maize, maize flour, maize grits, wheat and wheat flour (GB 2762-2025 Table 3, item 2.1); total mercury Anchor ID absent from the current HMI register snapshot.
[06] Ni	Commission Regulation (EU) 2024/1987 cereals except durum/rice/husked-rice/pseudocereal/oat rows
[07] Al	China GB 2760-2024 baked foods (bread, pastries, cakes, biscuits, cookies, crackers); deep-fried flour products; batter, breading, and frying powder
[08] Cr, Cr-VI	Hong Kong Cap. 132V Vegetables, other than pulses
[09] Sn	Singapore Food Regulations (2026 record) any food

HOW TO READ PROVENANCE

Government limit, read-across, precautionary choice and parent-bound ceiling are different derivations. Matching a number does not make those derivations interchangeable.

Source titles with an available URL are clickable. A register URL may lead to an index or secondary host; release checks must establish the actual primary instrument.

Basis & review notes

03 Feed-law context

Feed ceilings below are retained as contextual source records. They are not substituted for the HMTc schedule and have not been requalified for this ingredient or normalized across moisture bases in this proof.

ANALYTE	RECORDED FEED CEILINGS (µg/kg)	SOURCE SCOPE
Lead	Japan 3,000; European Union 5,000	pet food; complete feed
Cadmium	Japan 1,000; European Union 2,000	pet food; complete feed for pet animals
Total arsenic	European Union 2,000	complete feed
Inorganic arsenic	Japan 2,000	pet food
Total mercury	European Union 300	compound feed for dogs, cats, ornamental fish and fur animals

The supplied PDF is an older edition

Its inorganic-arsenic value is attributed to Israel read-across. The current record retains the same number as a precautionary choice against an EU source floor. The proof shows the current provenance without changing the ceiling.

The variant join is inconsistent

The page manifest requests variant "default" while the record stores "both". This proof explicitly selects "both"; a release generator should reject ambiguous joins instead of silently taking the first variant.

One source pointer is unresolved

The mercury record names a GB 2762-2025 anchor that is absent from the HMI register snapshot used for this proof. Source verification and applicability remain open.

04 About this proof

This three-page design sample covers the limit schedule, source map and review notes. It does not reproduce the complete occurrence narrative, jurisdiction matrix or program manual. No certification threshold, DOI, effective date or live download was changed.
